

Corona-Virus? Solidarity!

Dear neighbours,
dear house community,

in the face of the current corona pandemic it is up to all of us to show solidarity and get through this difficult situation together. If you are part of the high risk group we neighbours are happy to go shopping for you and help you out in other ways if needed, so that you do not have to leave your residence and expose yourself to the risk of infection.

The high risk group includes:

- People 60 years old or older
- People with pre-existing conditions
(lung diseases, diabetes, cardiovascular diseases, etc.)
- People with a weak immune systems

One or more of these points apply to you? Then be especially careful and leave the house as rarely as possible! Besides washing your hands, this is the most effective way to minimize the risk of infection.

If you need assistance, the neighbours listed below will be happy to help you. If you are not part of the high risk group and would like to help our neighbours as well, please write in your name, phone number and door number the list below.

You are experiencing symptoms such as fever, dry cough and/or shortness of breath? **Don't go to your family doctor on your own!** Instead, dial the health number 1450, who will initiate the next steps.

You need help?

You can call me! I'll happily go shopping for you,
walk your dog or take care of other urgent things:

Name	Phone number	Floor/Door
